

Button and tab color | Open layouts

The highlight color sets the color of the buttons on the registration page and the primary and sidebar tabs in the event window.

Note: The text color is automatically set to white or black, to contrast with the highlight color. If you select a dark color, the text is white. If you select a light color, the text is black.

To change the highlight color:

Go to the Player & Branding tab. Open **Advanced Branding** and set the Highlight Color.

This example shows green buttons on the registration page and green tabs on the event window.

The image illustrates the application of a highlight color across different parts of the user interface. On the left, a configuration box labeled "Highlight Color" shows the hex code "#4a9900" and a small green square icon. Red lines connect this configuration to two screenshots. The top screenshot shows a registration page for "Keynote Kickoff" with green buttons for "Add to Calendar" and "Register Now". The bottom screenshot shows an event window with a green "Slides" tab and a green "Ask a Question" button. The event window also displays a video player with a woman's face and a list of event resources.
