

Supported 3rd party tools

Enhance your events by including interactive elements with third-party apps and platforms. By default, polls, Q&A, and surveys are already included with your webcasting account, but you can use your own third-party tools to include these features, captions and interpretation, and more.

Note: You must have an account with the app or platform that you want to incorporate in your event.

We've tested and currently support the following third-party tools. Don't see the tool you'd like to use? Contact Support or your sales representative.
